aspect™

a different view of skincare

The **Aspect™** range of cosmeceuticals has been expertly engineered with the latest cutting edge optically pure actives from medical science and nature to protect, nurture, revitalise, and cosmetically restructure your most precious asset. Whether it's the look of imperfections that's marring your appearance or the lines of time that announce your age, **Aspect™** promises to deliver the youthful glowing skin and complexion that you so desire in no time at all.

Working with mother nature and never against her, **Aspect™** cosmeceuticals are always free of parabens, sodium lauryl sulphate, propylene glycol, petrochemicals, artificial colours and synthetic fragrances because skin in need should be nurtured and never tortured. And naturally **Aspect™** is never tested on animals.

We look forward to sharing this remarkably different view of skincare with you through this extraordinary range.

Important Consumer Information: All **Aspect™** cosmeceuticals are cosmetic correctives and no therapeutic action is intended or implied. Before and after images represent exceptional cases and individual results may naturally vary.

aspect™

Purastat 5™

CLEANSER

Because precious skin and dirty dishes have nothing in common.

aspect™

The first and most crucial step in any effective skin care regimen is the cleansing step, however, it's also the most neglected part – often an afterthought.

Now we are not referring to the fact that you were a little bit naughty and neglected to remove your makeup before bed the other night even though you know you should have! What we are referring to is the thoughtless way most cosmetic chemists literally throw together an assortment of not so skin friendly ingredients and choose to call it a facial cleanser when such products would be far better suited for washing up dishes or even cleaning the kitchen floor.

Take a quick glance at the ingredient listing on your average cleanser and compare it to the ingredient listing on a bottle of dishwashing liquid and you'd be shocked to see the similarities. Harsh chemicals such as sodium lauryl sulphate, propylene glycol, methyl paraben, propyl paraben, formaldehyde, synthetic perfumes and so forth are well documented skin irritants and not only have a nasty habit of leaving your skin uncomfortably dry, tight and devitalised but according to leading authorities such as the American Academy of Dermatology, are a very common cause of skin allergies and contact dermatitis.

If you own one of these not so skin friendly cleansers, perhaps it's not such a bad thing that you neglected to wash your makeup off the other night. At least your skin got a short reprieve from the chemical assault such products inflict.

Because cleansing is in fact the crucial first step in an effective skin care

regimen, the scientists at **Aspect™**, have actually put a lot of thought into the best way of achieving a fresh, clean skin so that it not only does your skin no harm but actually enhances your complexion for the better. **Purastat 5™** is the result of our efforts – an extraordinary one of a kind cleansing formula that will exceed your expectations and change the way you think about the simple act of cleansing your face forever.

The **Purastat 5™** Difference:

Purastat 5™ Purifies: Free of harsh, damaging surfactants that strip, damage and devitalise your skin, **Purastat 5™** thoroughly frees your skin of imbedded dirt, makeup, excess sebum and damaging pollutants by way of an exceedingly gentle blend of sugar and coconut extracts that cleanse and detoxify with the utmost efficiency whilst remaining totally respectful of your skins natural bio-lipidic barrier so as never to strip, dehydrate or overly dry your precious skin.

Purastat 5™ Renews: Formulated with a superb blend of natural fruit acids from bilberry, sugar cane, sugar maple, orange and lemon, **Purastat 5™** effectively renews your skin and complexion by gently unplugging congested pores, discouraging imperfections and lifting away those dulling surface cells and debris that stand between you and your most vital complexion.

Purastat 5™ Restores: While most cleansers rob your skin of vital moisture, leaving it uncomfortably dry, tight and lacklustre, **Purastat 5™** works overtime to replenish and build vital skin

hydration thanks to the inclusion of lactic milk extracts. This natural milk derivative is known for its ability to penetrate and attract moisture into the skins deepest layers and lock it in place. The result is a dramatic, measurable increase in skin hydration that persists for up to 4 hours – long after you have rinsed the cleanser off.

Purastat 5™ Protects: Botanical infusions of Wasabi root ferment and Canadian Willowherb™ work in tandem as a protective coat of armour and strengthen the appearance of your skin's natural defences so it is better able to cope with the visible signs of stress caused by smog, pollution and environmental aggressors.

Purastat 5™ Comforts: Even the most fragile and delicate of complexions will benefit from the inclusion of more than 7 calming botanicals including extracts of nettle, melissa, cleavers and calendula that work in synergy to comfort and care for skin in need of extra gentle care.

No matter what your skin type. We know you will absolutely love **Purastat 5™** not only for what it takes away but also for what it gives back to your skin and complexion, and never again will you neglect the first commandment of effective skin care “thou shall not neglect to remove thy makeup before bed, no matter how tired I feel”.

Cell-ablation™

SCRUB

Polished perfection in a jar.

aspect™

Symptom: you've got amazing, translucent, glowing skin. You just can't see it because of the dull, flaky, discoloured, broken out, exhausted skin that is currently covering it up.

Solution: Our **Cell-ablation™** microdermabrasion crème will make the dull, depleted, not so perfect skin you've earned with those late nights, coffee fuelled work binges and overexposure to the sun pull a disappearing act.

Cell-ablation™ delivers both immediate satisfaction and long range perfection – tangible, visible results that you can see and feel – clearer, healthier more youthful looking, baby smooth, almost pore less skin. A whole face treatment takes but a few minutes at your bathroom sink. Just apply, massage, rinse and you are done. It really is that simple, yet the results will amaze you.

The **Cell-ablation™** Difference

Cell-ablation™ naturally resurfaces without the traumatic consequences!: It's a fact; most home use microdermabrasion formulas rely on the use of aluminum oxide particles to abrade the skins surface of dead skin cells. Whilst effective in the hands of professionals, it is our opinion that Aluminum oxide has no place in home use microdermabrasion treatments. It is far too abrasive for frequent home use and can leave your skin red, irritated and traumatised whilst on the surface this may seem only a minor inconvenience. After all, they say where there is no pain there is no gain, but unfortunately for your skin, nothing could be further from the truth. You see, exacting medical and biological studies

now confirm that harsh skin treatments set in motion a chain of chemical events at a deep cellular level that literally destroys the skins underlying collagen support structure. The result is premature sagging, wrinkles and a wasted devitalised looking skin surface – a far cry from the clear, glowing complexion you were hoping to achieve.

Cell-ablation™ is different. Instead of aluminum oxide particles or other harsh abrasives, **Cell-ablation™** is powered by exceedingly effective yet super gentle “silica crystal technology”. Harvested from the nodes of black bamboo, our silica micro crystals are perfectly

Day 0

contoured and measure a mere 160 microns in diameter the perfect morphology for polishing away all of those devitalised skin cells, surface imperfections and pore clogging debris to uncover a fresh, new vibrant layer of healthy skin cells just below the surface and all without the slightest hint of irritation.

To further add to the effectiveness of your **Cell-ablation™** experience, our unique formula has been supercharged with a botanical cocktail of skin saving antioxidant vitamins, essential fatty

acids, and calming plant extracts to protect, nurture and energise the newly uncovered layer of fresh new skin cells.

Seeing is believing so we put **Cell-ablation™** to the test to demonstrate that it really can make a dramatic difference to the look and feel of your skin in no time at all. The amazing unretouched photographs below demonstrate the remarkable skin resurfacing action of **Cell-ablation™** after only 10 X three minute treatments over a 20 day time frame. Now look at the dramatic transformation in our models skin and complexion. Rough textured dehydrated skin has been replaced with a much

Day 20

smoother, hydrated healthier looking surface texture, those fine dehydration lines around her eyes are all but barely visible and even those stubborn hormonal marks appear noticeably lighter. As you could imagine, our model was ecstatically happy with the performance of **Cell-ablation™**.

Use **Cell-ablation™** just once and be amazed at just how much smoother, brighter and healthier your skin and complexion will appear. Use it regularly and the result is sheer complexion perfection.

Extreme C 20™

VITAMIN C SERUM

4.58 years younger in 84 days –
now that's extreme!

aspect™

Can Extreme C 20™ really give you firmer less wrinkled, brighter looking skin and wipe up to 4.58 years off your skins appearance in just 84 days*?

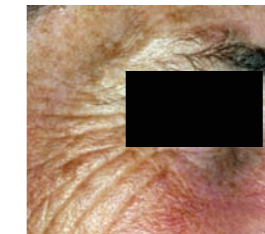

Surprisingly, the answer is yes, it certainly can, plus a whole lot more. Now that's a pretty bold promise, I know and the results even shocked us when all but one of the 27 participants in the 84 day **Extreme C 20™** efficiency study reported a perceived age reduction of between 1.4 to 7.6 years with the average age reversal score coming in at an incredible 4.58 years younger – now that's "extreme".

Why so effective? **Extreme C 20™** tackles just about every sign of dermal ageing you care to imagine and does so from every conceivable angle, thanks to an exclusive breakthrough combination of cutting edge amino peptides, face saving vitamin C, cellular antioxidants, corrective botanicals and skin energizing extracts – all expertly blended into a light as air, paraben and fragrance free transcellular serum. Read on and learn more about just some of the high octane technology that powers this age defying wonder.

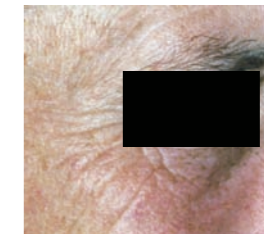

Ascorbyl Tetraisopalmitate ("Stable" Lipid Soluble Vitamin C ester) : No doubt you've heard about the wonders of topical Vitamin C. Clinical studies amassed have proven beyond doubt that this powerful antioxidant vitamin can dramatically repair the look and feel of environmentally damaged skin and cosmetically compensate for the visible decline in skin's youthful firmness and elasticity that accompanies the passage of time and too much sun exposure. At least in theory this is certainly the case. The only problem is that ordinary Vitamin C is highly unstable and quickly becomes inactive when exposed to air,

water, heat or light. In fact many Vitamin C skin care products can lose up to 90% of their original potency within 30 days after they are manufactured. Another concern with ordinary vitamin C is that it is very acidic making it difficult for those of us with sensitive skin to enjoy the rejuvenating benefits of this fabulous vitamin. Light years ahead of ordinary vitamin C comes Ascorbyl Tetraisopalmitate, a potent, non irritating, highly stable and optically pure Vitamin C ester that is guaranteed to remain fresh and active till the very last drop thus ensuring superior cosmetic anti-ageing results – clearer, firmer, much younger looking skin and a complexion that is better able to protect itself against

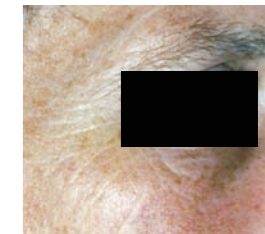

relax the appearance of deep expression lines that result from repeated facial movements such as laughing, smiling frowning and squinting. What the Hollywood celebrities are in fact using is "Syn®-Ake", a key active in **Extreme C 20™** with a molecular structure that resembles "Viper Venom". Sounds scary, but rest assured, it is completely safe and incredibly effective with a proven 52% reduction in the look of deep forehead wrinkles lines and up to 32% reduction in the appearance of crows feet all in just 28 days. **Syn®-Coll** (Also known as Palmitoyl Tripeptide-5): A super potent micro collagen peptide that literally rebuilds the appearance of slackened skin texture at

Day 0

7.2 years

Average perceived facial age as judged by 27 participants – 23 female, 4 male aged between 34 – 71 over 84 days of twice daily application of Extreme C 20™. *Triallist in before and after photographs incorporated Exfol L 15™ & Retinol Brulee™ into regimen between days 84 and 247. This is an exceptional case and individual results may vary. Extreme C 20™ is a cosmetic corrective and no therapeutic claim is implied or intended.

external attack so it remains younger looking for longer.

Syn®-Ake (Winner of the Swiss Technology Award): Believe it or not, the latest Hollywood beauty fad is said to involve rubbing snake venom onto the face in the quest for eternal youth. Sounds bizarre and dangerous, but in fact this strange practice that the media are referring to is completely safe and scientifically validated to dramatically

cellular level to visibly firm up facial contours and fill the look of deep lines and wrinkles that add years to your appearance. To prove the dramatic anti wrinkle effect of **Syn®-Coll** a clinical study involving some 60 healthy volunteers and spanning some 84 days demonstrated a stunning reduction in the visible length, depth and volume of facial deep lines 350% more effectively than a leading competitor's peptide compound.

Exfol L 15™

EXFOLIATING SERUM

Superior skin resurfacing
without the trauma!

aspect™

Alpha hydroxy Acids (AHA's) are without question one of dermatology's greatest success stories. AHA's work their magic by accelerating the skins natural cell renewal cycle by invisibly lifting away the excess accumulation of dull devitalised surface skin cells thereby revealing a smoother clearer, brighter, healthier looking surface layer, with more refined looking pores, and fewer visible imperfections.

When formulated correctly and in the right circumstances, the clinical effects of these magic AHA's are often nothing short of breathtaking!

AHA's however are not without their downside. To work effectively, they must be formulated at a low "acid" pH, which can leave skin red, itchy and super sensitive. To add insult to injury, many cosmetic companies in an effort to save money and maximise profits use synthetic AHA's which unlike the more expensive naturally derived extracts are known for their potential to inflame the skin.

Now comes a breakthrough technology that allows you to enjoy all the amazing skin renewal benefits of AHA's without any of the drawbacks. **Exfol L 15™** delivers everything a superior clinical strength AHA formula should – fresher, clearer, brighter, smoother skin texture, smaller looking pores and fewer visible imperfections all in record time and without having to suffer any redness, irritation or trauma. Here's how it works:

Exfol L 15™ has been intelligently engineered with only gentle naturally derived AHA's as opposed to the irritating synthetic varieties. L Lactic acid from sour milk along with botanical

extracts of bilberry, sugar cane, sugar maple, orange and lemon are combined in exacting concentrations that are delivered to the skin via a specialised time delay mechanism to ensure a super gentle controlled, even micro exfoliation without the trauma. Gentle however doesn't mean ineffective.

Make absolutely no mistake about it: **Exfol L 15™** is a powerful skin resurfacing solution with inclusions that are clinically proven to dramatically accelerate the skin's natural cell renewal/exfoliation cycle thereby revealing a fresh new glowing complexion in no time at all and that's a promise!

To further enhance the gentleness of this superb formula **Exfol L 15™** borrows a little wisdom from the ancients. For thousands of years, Native Americans were said to harvest a precious botanical from the Canadian prairies that was believed to cosmetically nurture, revitalise and comfort the look and feel of sensitive, angry looking skin. Modern research has now confirmed what the Native Americans always knew. A recent groundbreaking clinical study has proven beyond doubt that the miracle plant in question that goes by the name of Canadian Willowherb™ really does dramatically calm the look and feel of stressed, environmentally ravaged skin and continues to calm and nurture for up to 24 hours after just one single application making it a perfect addition to **Exfol L 15™**.

Exfol L 15™ is super concentrated and highly efficient so you'll see the benefits within as few as seven days and in 6

Exfol L 15™

Proven efficiency without the side effects*.

In a 6 week efficiency trial of **Exfol L 15™**, participants reported the following observations:

- 94% noticed smoother, softer skin
- 88% noticed a healthier appearance
- 82% noticed smaller looking pores
- 70% noticed clearer, more evenly coloured skin
- 94% noticed fewer visible lines
- 76% noticed fewer visible imperfections
- 82% noticed firmer looking skin
- 76% noticed a visible improvement during the first 7 days
- 100% described **Exfol L 15™** as gentle and non-irritating

*17 participants (13 female and 4 male) over 42 days. Trial administered by a senior registered nurse.

short weeks, you will happily discover that underneath the skin you can see is the skin you've always wanted!

Red-Less 21™

SEA BUCKTHORN SERUM

Relaxation therapy in a bottle for skin
on the verge of a nervous breakdown!

aspect™

**Facial redness? Skin sensitivity?
Chronically dry skin? Uncomfortably
tight skin? Uncontrollable blushing?
Rough flaky crocodile skin?
Ruddiness? Lumps and bumps?
Reacts to spicy foods and alcohol?
Reacts to fragrances, colours and
preservatives? Feels like its on fire?
Blotchy? Has a mind of its own? Looks
older than it should? Unhealthy
looking? Devitalised?**

If you identify with any or all of these common signs of “stressed out skin” help has finally arrived!

Red-Less 21™ is a very serious cosmetic corrective with the power to comfort and relieve the look and feel of stressed out skin on the verge of a “nervous breakdown”. Apply a few drops and within minutes skin feels relaxed, more comfortable and less tight as though the fire has been put out. Within weeks, the signs of stress are diminished, the look of redness is neutralised and skin defences are remarkably strengthened so it is better able to cope with harsh, unfavourable conditions that would have once caused it to react and cry out for help.

The secret to **Red-Less 21™** lies in its synergistic blend of 21 completely natural face saving botanicals, herbs, vitamins and extracts. The most bioactive and beneficial of all is its very high content of certified organic Sea Buckthorn berry oil. This remarkable botanical provides just about everything your skin needs to look healthy, vibrant, youthful and resist those aggressors that damage its appearance. So effective is Sea Buckthorn that it was issued to the Russian cosmonauts to nourish and

protect their skin against the harsh environmental conditions encountered during intergalactic travel and has since gained acceptance in some of Europe's most prestigious hospitals as a natural dermatological treatment for a vast number of skin care concerns.

About Sea Buckthorn: Sea Buckthorn is a bright orange fruit native to the arctic region with antioxidant and vitamin content rivalled by no other cultivated fruit or vegetable in existence. In fact Sea Buckthorn contains no less than

Day 0

108 synergistic face saving bioactives including abundant levels of Vitamin C, Beta and Alpha carotenes including alpha and beta carotenoids including lutein, zeaxanthin & lycopene, the full spectrum of Tocopherols (Vitamin Es) including the super protective alpha, beta, gamma & delta Tocotrienols, Super Oxide Dismutase, Vitamins B1, B2 and B6, phytosterols, phytohormones, polyphenols, tannins, flavanoids, essential fatty acids including the omega 3s, omega 6s and very rare omega 7s, as well as numerous trace elements including zinc, copper, selenium and magnesium just to name a few. With an ingredient

listing like that, it's little wonder that Sea Buckthorn has such a dramatic ability to protect and repair the appearance of not so healthy looking skin.

To ensure **Red-Less 21™** delivers only benefits and never upsets your precious skin, **Red-Less 21™** has been selectively formulated with only 100% natural and certified organic ingredients and is completely free of preservatives, colours and artificial fragrances.

Day 42

Jungle Brew™

PROBLEM SKIN SERUM

Chemical free – because problem skin should be nurtured – not tortured!

aspect™

If you suffer the misery of spotty, excessively oily or impure skin, you will no doubt have tried a myriad of cosmetic treatments with the hope of finding that magic “clear skin” solution only to find that the “cure was worse than the disease”*.

Most products designed for oily and impure skin contain harsh and potentially skin damaging chemicals such as synthetic detergents, peroxides, alcohol and sulphur which are designed to strip, degrease and dry out the problem. The promise is clear, glowing skin but the result is often a red, itchy and traumatised complexion, as if that wasn't the last thing you needed! To make matters worse this “drying out” approach is counterproductive as it causes the body to respond with even more pore clogging oil to combat the dryness, thereby setting in motion a self defeating vicious cycle – a miserable no win situation for your skin.

Whoever it was that said “ where there is no pain , there is no gain” obviously didn't know about **Jungle Brew™**.

Jungle Brew™ is the revolutionary natural, non-traumatic cosmetic solution for oily and impure skin that will never dry, damage or upset the skins natural balance. Most importantly **Jungle Brew™** works fast to deliver the results you want. Within hours of application you will see a calmer, less angry looking complexion and in just 8 weeks a cleaner, clearer, less shiny, healthier looking skin with smaller looking pores and fewer visible imperfections. Little wonder skin care experts across Australia and New Zealand are enthusiastically embracing the

Jungle Brew™ gentle approach to clean, clear beautiful looking skin.

Jungle Brew™ – inspired by nature and proven by the latest scientific discoveries. Here's just a preview of what's inside:

Jungle Brew™ Discovery No. 1: During the 2008 American Academy of Dermatology annual meeting, doctors were truly amazed at the results of a recent groundbreaking study that reported the extraordinary skin clarifying action of topical 5% Stay-C 50™ over a 12 week time frame. This revolutionary nature inspired compound known as Stay-C 50™ is in fact a high tech variety of vitamin C that was shown to banish the look of those miserable imperfections that accompany oily skin with far better efficiency than traditional chemical treatments and even more importantly without any of the harsh side effects such as redness, dryness and irritation.

With this exciting discovery in mind Jungle Brew has been supercharged with no less than 6% Stay-C 50 which is a 20% greater concentration than that used in the clinical study to seriously wage war against the appearance of those horrible imperfections that ruin your looks and destroy your confidence.

Jungle Brew™ Discovery No. 2: From the depths of the Amazonian rain forest come three remarkable “clear skin” discoveries with the power to clarify, perfect and regulate the appearance of oily impure skin. Acai, Andiroba and Copaiba Balsam are the names of these amazing face saving botanicals. A bit of a mouthful I agree, but stay with me as the science will blow your mind as it did

the investigating dermatologists when they saw the results. In not one but two clinical trials, these remarkable rain forest plants were shown to banish the look of unsightly imperfections and unclog pores by no less than 72% in just 56 days as well as regulate the look of excess oiliness by a surprising 65% by day 42. When the volunteers themselves were questioned about their experience 90% saw a dramatic reduction in the appearance of imperfections, 95% described their skin as less oily, 85% noticed more refined cleaner looking pores and 90% said that the treatment was not only non-irritating but actually improved skin hydration and smoothness.

Along with these amazing natural discoveries, **Jungle Brew™** contains a range of calming botanicals, face saving vitamins and soothing herbs, is free of irritating parabens and comes in a non greasy, super fast absorbing serum base. Apply a little just twice per day and discover the confidence of clearer, cleaner healthier looking skin – naturally.

Pigment Punch™

EVEN SKIN SERUM

A “naturally” lighter & brighter future for your complexion.

aspect™

Age spots, brown spots, freckles, hormonal marks, blotchy uneven skin tones, red, brown acne scars... lets face it, these unsightly blemishes add years to your appearance, ruin your complexion and can really destroy your confidence.

Up until recently, the only reliable method of “cosmetically” eradicating these horrible imperfections was the use of irritating and potentially dangerous chemical skin lighteners. So dangerous in fact that many such products have been banned from sale in Europe and the US may well follow.

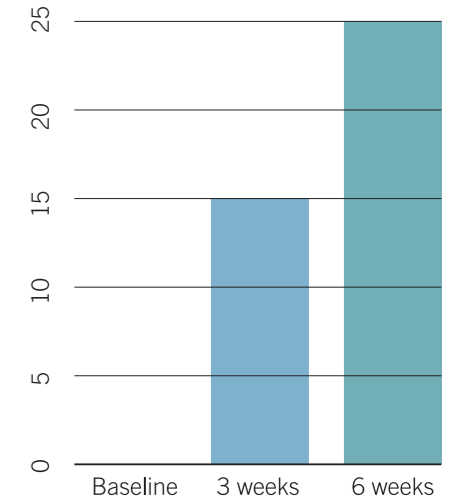

But now a breakthrough discovery by one of Europe's leading biotechnology companies has shown that a specific extraction of Rumex Occidentalis – a plant native to the Canadian prairies can clarify and brighten the appearance of unsightly age spots and discolourations with even greater efficiency than the dangerous chemical alternatives and most importantly without the burning, irritation and trauma.

So innovative was the discovery that the ingredient was patented and named Tyrostat™.

Clinical studies prove that the topical use of just 3% Tyrostat™ begins to brighten the complexion from the very first application and can diminish the visible appearance of unsightly age spots and pigmentation marks by an impressive 25+ % in just 6 weeks. As an added bonus, this remarkable botanical was not only found to be completely non irritating and free of side effects but was actually shown to calm and tone down the look of facial redness – certainly an unexpected yet welcome finding.

Now for the first time, you can benefit from this groundbreaking natural discovery and enjoy a dramatically clearer, brighter more evenly toned skin and complexion, not to mention a vital boost in self confidence thanks to **Pigment Punch™**.

Pigment Punch™ is a fast absorbing transdermal serum and contains no less than 10% Tyrostat™ (that's more than 3 times the concentration used in clinical studies!), plus a cocktail of pure botanical antioxidants, skin brighteners and skin saving vitamins to ensure maximum effectiveness in record time. Apply just a little twice per day in conjunction with SPF 30 sun block to any and all areas of your face and body affected by discolouration and your complexion will be well on its way to a lighter and brighter future – naturally!

Tyrostat™ dramatically reduces the appearance of age spots and discoloration

Before

After

A Truly remarkable transformation after only 26 weeks of using the **Aspect™** Complexion Perfection Program which includes **Pigment Punch™** twice daily and four professionally administered Pigment Punch™ Clarity Peels.

Retinol Brulee™

RETINOL SERUM

Empty promises or real results...
you now have a choice.

aspect™

Since 1984, The word “Retinol” has been synonymous with clear, healthy, youthful looking skin. No other ingredient in the history of skin care has undergone such rigorous clinical studies in order to prove its worthiness as the “gold standard” in anti-ageing skin care.

What can you expect from effective Retinol therapy?

A correctly formulated Retinol product and note that we say “correctly formulated” can have a profound impact on just about every conceivable sign of ageing that you care to mention.

Clinical studies amassed have shown that Retinol can dramatically smooth away the look of fine lines, plump out the appearance of deeper wrinkles, promote a more elastic, firmer skin texture, clarify the appearance of mottled pigmentation and discolourations, retexturise and refine the skins surface, shrink the look of pores, discourage the appearance of imperfections, regulate the appearance of excessively oily skin, restore a healthy glow to a sallow devitalised complexion, eliminate dry, rough patches—the list of benefits is endless.

Now for the downside. It may shock you to learn that most Retinol products are a complete waste of money. You see, Retinol is one of the most unstable vitamins in existence. Expose it to air, light or heat for even a short period of time and it quickly breaks down into useless compounds that will do nothing to improve the appearance of your skin. Think of Retinol as you would a bottle of milk. Even under the best refrigerated conditions it lasts but a few days before it deteriorates.

Be warned, quite a few companies claim that their Retinol is stable but can they provide the proof? The answer is generally not. So steer clear and don't waste your money on a bottle full of empty promises.

As if all of that wasn't bad enough, you'll be doubly shocked to learn that many so called Retinol containing formulas utilise an inexpensive partially inactive variety of this vitamin. This type of partially inactive Retinol is often disguised with vague “sound alike” names such as Pro-Retinol, Retinol-Ester and many more. These “Retinol Impostors” at best deliver only a fraction of the cosmetic anti-ageing benefits of true Retinol and therefore you may only be getting a fraction of what you paid for so beware.

Now for the good news – its called **Retinol Brulee™** and unlike some of the more questionable so called Retinol products out there, promises to deliver the results you want day after day, week after week, month after month. Right to the very last drop.

To guarantee effectiveness, **Retinol Brulee™** uses only the 100% pure bioactive Retinol in the highest allowable concentration – any higher and you would actually require a prescription!

To ensure stability of the very fragile Retinol molecule, **Retinol Brulee™** utilises a cutting edge patented micro-encapsulation technology developed exclusively by Tagra Biotechnologies Ltd, that promises superior stability, potency and performance for clearly visible cosmetic anti-ageing results you can actually see and others will notice.

Here's how it works: The microscopic Retinol containing capsules (also known as Tagravit™ R Microcapsules) are exceptionally robust and remain fully intact in the bottle thereby acting as a protective coat of amour around the delicate Retinol molecule. Only upon application by finger pressure and rubbing action, do these microcapsules release 95–97% of their precious Retinol content directly onto your skin.

Now you may have heard that Retinol therapy is not without some minor side effects such as mild irritation, and temporary dryness. This we admit is absolutely true of “effective Retinol products” and indicate that it is actually working within your skin to deliver the results you want.

To help overcome any minor disruptions, **Retinol Brulee™** incorporates the clinically proven benefit of Canadian Willowherb™, a powerful botanical with the proven ability to cosmetically strengthen the skin's defences against external aggressors and maintain a superb level of visible calmness and serenity so that you may enjoy the remarkable cosmetic anti-ageing benefits of **Retinol Brulee™** without too much of the stress.

Like all **Aspect™** formulas you'll be glad to hear that **Retinol Brulee™** is free of parabens, artificial colours and fragrances so its exceedingly kind for even the most sensitive of skins.

Eyelift 3™

EYE SERUM

Dark circles, fine lines, puffiness... eyes come with a lot of baggage but with Eyelift 3™ they don't have to weigh you down!

aspect™

Even if eyes aren't really the windows to the soul, they certainly give a pretty good insight into what we've been up to. Been burning the candle at both ends? Those dark circles certainly suggest so. Been flagging on the water-intake and enjoying a glass or three of white instead? Tell tale puffiness gives the game away.

Imagine an eye serum so powerful that it could dramatically wipe out the appearance of those hideous under eye circles and smooth away the look of those unsightly bags and crows feet that betray your age. Sounds like science fiction, but thanks to a recent groundbreaking advancement in cosmeceutical science, it's now science fact.

Eyelift 3™ is the most complete and effective clinical strength formula for the cosmetic treatment of unattractive dark circles, under eye puffiness, and crows feet.

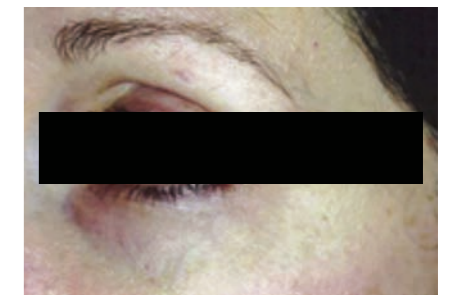

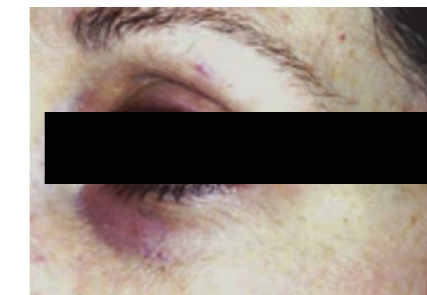

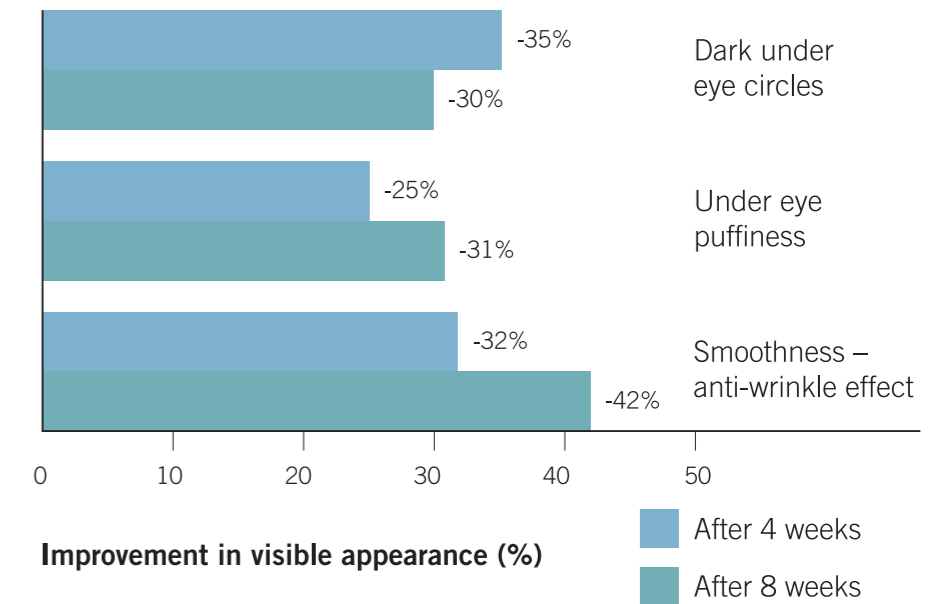

Powered by the latest cutting edge natural amino peptide technology, plus an energising synergy of more than 28 natural face saving botanicals and potent antioxidants, this remarkable concentrated serum will restore to your eye area what time and fast paced living have taken away.

Apply **Eyelift 3™** just twice daily and expect to see dramatic changes in as few as 4 weeks, and after 8 weeks of twice daily use, you simply won't believe your eyes!

The remarkable effectiveness of the key active in **Eyelift 3™** was demonstrated in a 56 day long clinical study and confirmed by detailed scientific image

analysis. Here is what the researchers found:

- Dark under eye circles: visibly reduced by 35%.
- Under eye puffiness: visibly reduced by 31%.
- Smoothness and skin texture: 42% smoother.

Phytostat 9™

MOISTURISER

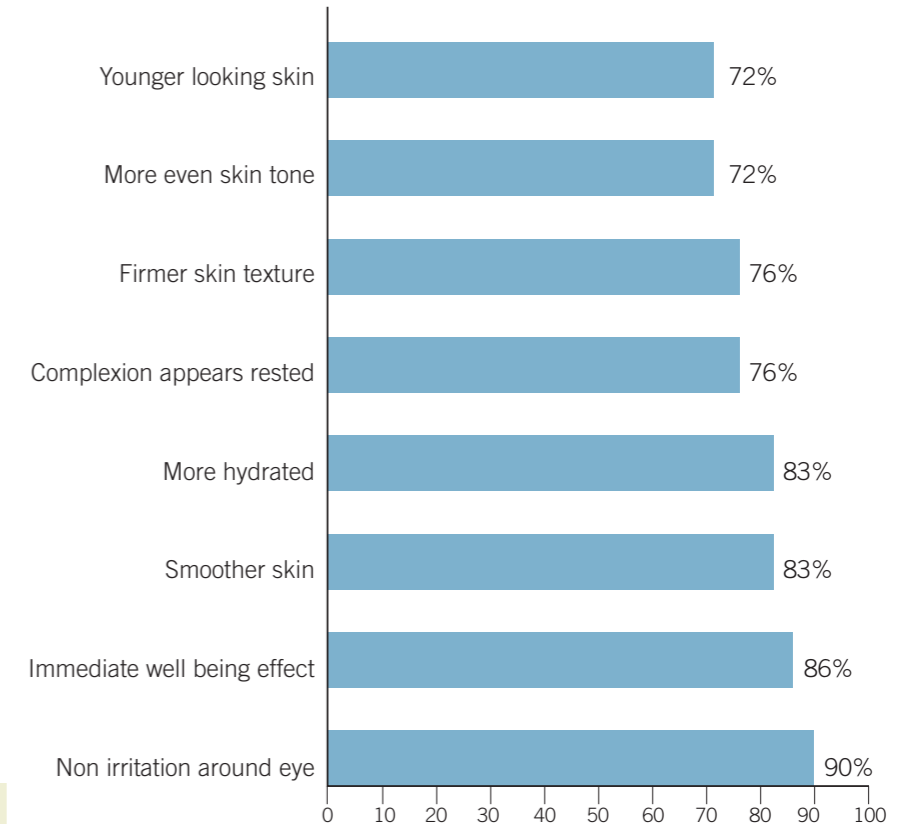

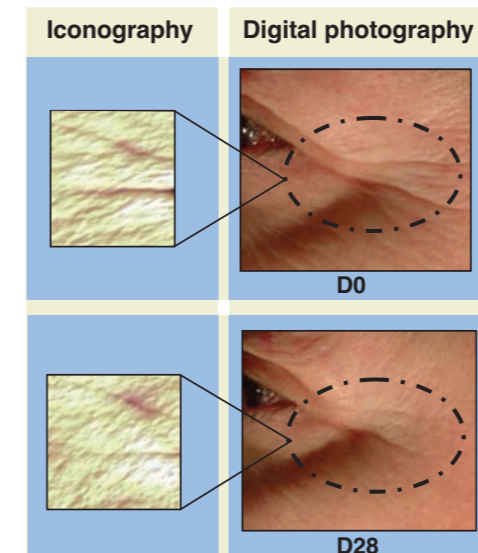

Try it and discover why people are calling it “the cream of the crop”.

aspect™

Say goodbye to the expense and inconvenience of separate day, night, neck and eye creams and say hello to **Phytostat 9™**, the 4 in 1, intelligent cream that adjusts to the specific needs of your skin 24/7 to dramatically restore vital moisture reserves, ward off the visible signs of ageing and cosmetically correct the effects of time in no time at all.

Apply just a dab of this extraordinary souffle and experience near instant gratification as this nutrient rich emulsion quickly replenishes skin's vital moisture reserves in even the thirstiest of skins.

Apply **Phytostat 9™** for just 28 days and witness a small miracle. The look of fine lines and wrinkles begin to melt away, surface firmness and elasticity are dramatically improved, the appearance of dull, uneven skin tones begin to make way for a brighter more radiant

complexion and not so smooth out of condition skin is visibly transformed to a smoother, baby soft velvety skin texture that feels great to touch.

all expertly blended in this luxurious paraben and fragrance free cream so it's gentle enough even for the most temperamental of skin's.

The key to **Phytostat 9™**'s remarkable performance lies in the synergistic blend of Chro-Noline, a high technology patented amino-peptide along with a clinically validated mix of skin saving antioxidants and nurturing lipids including pure organic sea buckthorn, chirally correct multi spectrum tocopherols, macadamia, almond and sunflower -

Table (top of page) represents the opinions of 30 participants who applied a cream containing (2.5% ChroNOLin™) twice daily over 56 days. Trial conducted by Atrium Innovations. Images represent the effects of twice daily topical applications of a 2.5% ChroNOLin™ cream over a 28 day period. Trial conducted by Atrium Innovations.

Clinical Skin Peels™

The cheat's way to a perfect, enviable complexion and flawless looking skin!

aspect™

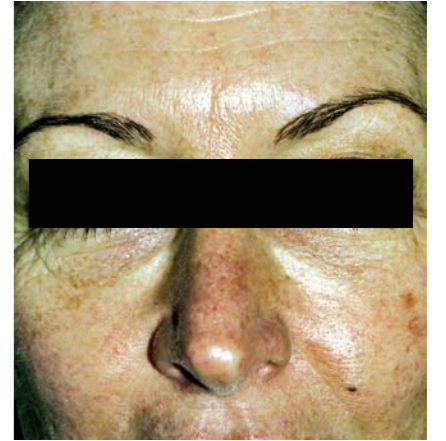

For those of you that already subscribe to a customised Aspect™ skin care program and want to fast track your progress or lets face it – "cheat your way to perfect looking skin really fast" we have devised a veritable smorgasbord of superb clinical strength peels to fulfil your quest for clear, glowing, youthful looking skin in no time at all.

Aspect™ Clinical Skin Peels are clinical strength results orientated corrective treatments and far superior to any ordinary facial in terms of truly visible results and long term durability. Clinical strength means that Aspect™ clinical skin peels are only administered by doctors, nurses and paramedical aestheticians that have been specifically educated and certified so you can rest assured that you are in excellent hands.

In keeping with the Aspect™ philosophy of skin care, the comprehensive Aspect™ range of peels is:

- Formulated with the highest concentrations of pure naturally derived botanicals and high octane cosmeceutical correctives.
- Formulated with certified organic non genetically modified ingredients wherever possible.
- Chirally correct and optically pure actives for maximum clinical results without unnecessary irritation or trauma.
- Free of propylene glycol.
- Free of mineral oils and other petrochemicals.
- Free of parabens and other harsh preservative systems.
- Free of artificial fragrances.
- Free of animal derived ingredients.
- Never tested on animals – only people.

To guarantee you get the results you are looking for, prior to any Aspect™ Clinical Skin Peel your personal practitioner will thoroughly assess your skin using a number of advanced diagnostic skills, consult with you as to the results you wish to achieve and recommend a course of treatments based on your unique skin care needs and lifestyle demands to ensure beautiful results with the least amount of disruption to your schedule.

Before treatment

After a course of 6 Lactobotanical™ epidermal peels and a professionally prescribed Aspect™ homecare regime.

Lactobotanical™ Epidermal Peel Series

No matter what your skin care concerns, whether it be the signs of premature ageing, a rough, dull environmentally damaged complexion, excessive oiliness, clogged pores imperfections, minor discolouration or uneven skin tone, the **Lactobotanical™** Peel Series guarantees beautiful results every time. This truly unique peel, exclusive to **Aspect™** is ideal for those of you that desire a very gentle yet highly effective clinically proven treatment that can be adjusted for strength according to your level of sensitivity so that even the most temperamental of skins can enjoy all of the benefits without the irritation that often accompanies lesser peels.

The **Lactobotanical™** Peel series synergies the exceptional skin retexturing, deeply hydrating and deep cleansing action of natural L Lactic Acid (AKA Milk Acids) in varying concentrations with the proven calmative and purifying action of Canadian Willowherb. And as for the results. Well they do say that a picture paints a thousand words, so turn back this page and take a really close look at the unretouched before and after pictures of our very satisfied model. See just how much clearer, smoother, more evenly toned, more beautiful her skin appears after only 6 **Lactobotanical™** epidermal peels and a prescribed **Aspect™** homecare regime. Now imagine what this miracle of a peel could do for your skin and complexion!

With just a few convenient half hour treatments scheduled at fortnightly intervals, you'll discover a new clearer, baby smooth glowing skin and complexion with fewer visible pores and imperfections guaranteed.

- Recommended number of treatments: 6 +
- Treatment duration: approximately 30 minutes
- Degree of peeling: no visible peeling to a light / moderate flaking of skin between days 3–7 after the peel depending on the strength applied. Skin may appear flushed for several days.

Retinol Brulee™ Professional Medical Strength Anabolic Resurfacing Treatment

Already addicted to **Retinol Brulee™** homecare and want to take things that step further? If so you'll adore our professionally administered **Retinol Brulee™** anabolic skin resurfacing treatment. Fine lines, wrinkles, dull, rough and lack lustre skin texture, visible pores, minor discolourations and muddy complexion can't but surrender to the this powerful rehab program for time damaged skin that synergises ultra pure encapsulated Retinol and milk derived L Lactic acid that work in tandem to deliver the most spectacular anti-ageing results in record time. Here's how: The Retinol works deep to encourage the appearance of new healthy cells and cosmetically compensates for diminished levels of skin firming collagen so skin texture looks and feels firmer whilst fine lines and wrinkles appear dramatically softened as though cushioned from within. L Lactic acid retextures and brightens by whisking away years of accumulated discoloured skin cells that dull your complexion whilst building vital long term moisture reserves for a renewed smoothness and suppleness that radiates health and vitality. Seriously visible results that will no doubt leave your jealous friends wondering! Of course, you could let them in on your little secret to seemingly eternal youth, or there again you could be really naughty and keep your exciting discovery all to yourself!

- Recommended number of treatments: 1–6
- Treatment duration: approximately 30 minutes
- Degree of peeling: no visible peeling to a light/moderate flaking of skin that usually begins day 2–3 and a possible flushed appearance that lasts but a few days.

Jungle Brew™ Professional Amazonian Detox Peel

No matter what your age, if you're seeing spots, excessive oiliness or clogged pores, the **Jungle Brew™** Amazonian Detox Peel will fast track your quest for pure, clear, healthy looking skin. This world first technology exclusive to **Aspect™** combines the powerful skin renewal and anti imperfection action of clinical strength alpha beta hydroxy acids which work to deep cleanse pores of those accumulated impurities and stale oils that lead to the appearance of unsightly imperfections whilst the patented blend of 3 clinically proven ultra purifying rainforest plants work deep to detox, calm and perfect the look of excessively oily, congested and blemish prone cosmetic concerns. With just a few quick treatments, unsightly imperfections make way for a dramatically clearer, calmer, healthier looking, less oily complexion – a real confidence booster in a bottle!

- Recommended number of treatments: 6 +
- Treatment duration: approximately 30 minutes
- Degree of peeling: no visible peeling to a light/moderate flaking of skin between days 3–7 after the peel. Increase in breakouts may be expected with initial treatments and indicates positive progress. Skin may appear flushed for several days, and discolourations may temporarily darken before peeling away.

Pigment Punch™ Professional Clarity Peel

Brown spots, hormonal marks and other skin discolourations not only spoil your looks but age you beyond your years. Now comes the **Pigment Punch™** Clarity Peel. This is a truly remarkable and unique breakthrough clinical treatment to rapidly clear away the appearance of those unsightly marks and visibly restore clarity to your complexion so that it appears to glow from within. The **Pigment Punch™** Clarity Peel combines the powerful skin renewal and clarifying action of clinical strength alpha beta hydroxy acids to lift away the accumulated layers of dull, discoloured cells, plus the remarkable skin whitening action of optically pure vitamin C and Tyrostat™, an organic herbal compound aka Rumex Occidentalis from the North Canadian prairies. Clinical studies have proven the remarkable power of this precious plant to whiten and brighten the appearance of skin troubled by age spots, and tan discolourations with exceptional efficiency and without the potential toxicity associated with chemical skin whiteners. With just a few short treatments, unsightly discolourations and uneven skin tone make way for a dramatically clearer, smoother brighter more evenly coloured complexion that glows with renewed youthful radiance that you'll see in the mirror and others will notice.

- Recommended number of treatments: 6 +
- Treatment duration: approximately 30 minutes
- Degree of peeling: no visible peeling to a light/moderate flaking of skin between days 3–7 after the peel. Discoloured areas may temporarily darken before peeling away.

Cabernet au Chocolat™ Age Deception Peel

How to lie about your age and make sure everyone believes you? The **Cabernet au Chocolat™** Age Deception Peel is the solution. This serious yet exceptionally decadent sounding anti-ageing peel combines clinical strengthalpha beta hydroxy acids with red wine extracts and pure certified organic cocoa. The Beta hydroxy acids resurface the skin to perfection by thoroughly disengaging layers of old discoloured skin cells to reveal a fresher, smoother surface with renewed clarity and radiance whilst red wine and organic cacao extracts bathe cells at the deepest level with powerful skin saving antioxidants to energise, protect and rebuild the appearance of firmer, less wrinkled looking skin. With just one treatment, you'll see and feel a remarkable difference and with a short course of treatments you really will be able to lie about your age and we guarantee – everybody will believe you!

- Recommended number of treatments: 6 +
- Treatment duration: approximately 30 minutes
- Degree of peeling: no visible peeling to a light / moderate flaking of skin between days 3–7 after the peel. Discoloured areas may temporarily darken before peeling away.
